

INDEX OF AUTHORS

- Abe
 bound variables 15
- Abney
 DP hypothesis 169–170
- Anttila
 Finnish vowel harmony 320, 331
- Authier
 null subjects in DP 227–230
- Baker
 argument inheritance in nominals 785
 head movement 28
 morphological visibility condition 785–792, 809
- Beckman
 positional faithfulness 299, 330
- Bierwisch
 argument linking and nominals 784, 816, 823, 829–831
- Borer
 expletives 654–656
 subject omission 618–620, 642, 650–651
- Burzio
 intransitive verbs 69
- Campbell
 Finnish vowel harmony 303, 306–307, 309–310, 314
- Cardinaletti and Starke
 pronoun (and linguistic) deficiency 161–170, 174–183, 210–216
- Chierchia
 functional dependencies 596–600
 functor anaphora constraint 734–736
- Cho
 privative features 279–281
- Choe
 Subjacency Condition 372, 390–391
- Chomsky
 adjunction 60
 Bare Phrase Structure theory 3, 20–21
 barriers 411
 Binding Theory 12–13, 15
 case checking 19, 28, 97, 106, 625–627
 L-relatedness 7
 minimalist program 87, 391–394, 418–425, 440–442, 613, 620
 scrambling 24–25, 27
 Shortest Movement Condition 135–136
 Subjacency Condition 371–373
- Chung
 wh-traces 433–435
- Dalrymple
 binding domains 259
 minimal complete nucleus 249–253
- Davis
 entailment-based theory of thematic roles 238
- Demirdache
 resumptive pronouns as blockers 609–610
- Den Hertog
 auxiliary selection in Dutch 67–68
- Dixon
 subject choice in optimality theory 702
- Doron
 restrictive relative clauses 587–593
- Dowty
 argument selection principle 684
 proto-agent and proto-patient roles 683
- Englund
 yes/no questions 577
- Epstein
 economy condition 385–388

- Erteschik-Shir
resumptive pronouns 590
- Ferguson and Groat
Shortest Move Requirement 96
- Godard
accessibility condition 718–735
- Grewendorf and Sabel
scrambling in German 41–42
- Grimshaw
argument linking 784, 830
- Guéron
body-part NPs 223–227, 236, 242, 251
- Halle and Vergnaud
Finnish vowel harmony 303, 310
see also Vergnaud and Zubizarreta
- Hayes
Chugach stress 506–511, 509
Goraa stress 510–511
weight-by-position 499–501, 523–524
- Heim
definiteness variables 758–759
- Hellberg
Swedish assimilation 285
- Hoji
short scrambling in Japanese 13
- Hornstein
derived tense structure 140–141
infinitival clauses 156
sentence-level theory of tense 123–124, 127, 136
weak crossover effects and Leftness Condition 17
- Huang
bi-clausal nature of V-de construction 454, 458
LF movement and Subjacency Condition 371–372
- Hyams
null subjects 615
- Ikola
Finnish vowel harmony 306–307
- Ito
coda condition 269
see also Mester and Ito
- Izvorski, King and Rudin
interrogative clitic 545–546
- Jackendoff
Lexical Conceptual Structure 67
- Jacobson
relative clauses and natural functions 603
- Kager
Chugach stress 506–511
contextually light syllables 515
theory of iambic lengthening 533
- Katz
Yiddish voicing assimilation 279
- Kayne
antisymmetry 85, 87, 92–93, 98, 118
French personal pronouns 161
Linear Correspondence Axiom 102
- Keenan and Polinsky
inclusive coordination 176–178
- Kiparsky
Finnish vowel harmony 309–311, 317, 320, 331
- Kirchner
output underspecification 326
- Kuroda
Japanese and 'forced agreement' languages 21
- Laenzlinger
clitic combinations in French 108
- Langacker
active zone 237
- Larson
movement theory 341–348, 367–368
syntax of alternative questions 367–368
- Lasnik and Stowell
weak crossover effects 16–17
- Legendre, Raymond and Smolensky
voice and typology 679, 683
see also Prince and Smolensky
- Levin and Rappaport-Hovav
argument linking 784
Direct Object Restriction 446–447, 470–471
- Lieber and Baayen
auxiliary selection in Dutch 67–70, 72–75, 77–83
- Lombardi
laryngeal neutralization 267–271

- privative features 271, 279–281
- Maddieson
 Australian languages with no voiced obstruents 277–279
- Mahajan
 scrambling and movement in Hindi 1–2
 scrambling in Japanese 7, 19
- McCarthy
 weight correspondence 501–504
- McCarthy and Prince
 correspondence constraints 270, 501
 moraic phonology 499
 Optimality Theory 269, 304, 792
 vowel harmony and alignment constraints 316
see also Prince and Smolensky
- Mester and Ito
 voicing assimilation 279
see also Ito
- Milner
 scope variability 762–763
- Minova-Gurkova
 enlarged stress domain 559
- Munn
 movement theory 345–348, 354, 367–368
- Nemoto
 scrambling in Japanese 11–12, 28, 31
- Nishigauchi
 LF movement and Subjacency Condition 372–374, 390–391, 401
- Ortiz de Urbina
 verb second (V2) analysis 407–412
- Penttilä
 Finnish vowel harmony 306
- Piggott
 weight constraints 511–512
- Pollard and Sag
 anaphoric dependency 258–259
 head-driven phrase structure grammar 770–779
 valence principle 255–256
see also Sag and Godard
- Prince and Smolensky
 harmonic alignment 679–681
 markedness constraints 271
 Optimality Theory 269, 304, 674–708
 variable weight constraints 505–515
see also Legendre, Raymond and Smolensky, and McCarthy and Prince
- Rajemisa-Raolison
 pronoun coordination 176–177
- Reichenbach
 sentence-level theory of tense 123–125, 127, 136, 149
- Reinhart
 bound pronouns 197
- Rizzi
 null subject parameter 616–622
 Infl 25, 43
- Ross
 gapping 352, 364
- Rudin, King and Izvorski
 interrogative clitic 545–546
see also Izvorski, King and Rudin
- Saarimaa
 Finnish vowel harmony 306–307
- Sadeniemi
 Finnish vowel harmony 306, 311–312
- Sag and Godard
 accessibility condition 718–735
see also Pollard and Sag
- Santorini
 scrambling in German 7
- Saito
 scrambling in Japanese 2, 4–5, 7, 10–12, 16, 31, 40–52
- Sells
 resumptive pronouns in DRT framework 590–591
- Shlonsky
 expletives 654–656
 resumptive pronouns 590, 609
- Silverstein
 hierarchy of features and ergativity 673–677, 705
- Simpson
 resultant state predicates 81
- Speas
 null subjects and licensing of syntactic positions 620–622, 627–628

- Sportiche
 specifier condition 718–721
- Steriade
 Finnish vowel harmony 307, 310
- Szabolcsi
 DP hypothesis 169–170
- Takahashi
 wh-movement 382–383
- Tanaka
 Subjacency Condition 393
- Tomic
 enlarged stress domain 559
- Ura
 covert super-raising in Japanese 22
- Välimaa-Blum
 Finnish vowel harmony 310–311
- Valois
 specifier condition 718–721
- Vergnaud and Zubizarreta
 predication theory 230–235, 251
 see also Halle and Vergnaud
- Watanabe
 scrambling in Japanese 11
 wh-islands 395
- Webelhuth
 scrambling in German 2, 7, 18
- Wiese
 syllable-final neutralization in German
 273
- Williams
 weak crossover effects and Leftness
 Condition 17
- Wunderlich
 lexical decomposition grammar 786
- Zoll
 alignment constraints 316

INDEX OF LANGUAGES

- Ainu
 - no voicing in obstruents 268
- Arabela (Peru)
 - no voicing in obstruents 277–278
- Arabic
 - Palestinian stress system 519–523, 525–526, 531–532
- Aranda (Pama-Nyungan)
 - markedness 704
- Axininca Campa
 - weight-by-position 530–531
- Basque
 - movement 403–442
 - syntax 404–407
 - unergatives 83
- Bulgarian
 - interrogative clitic 541–582
 - inversion of verbal clitics 566–569
 - negative stress shift 562–566
 - non-clitic auxiliaries 570–577
 - prosodic/clitic systems 551–555
- Cahuilla
 - variable closed syllable weight 523
- Catalan
 - voicing assimilation 268
- Chamorro
 - markedness 677–678
 - weight-by-position 530–531
 - wh*-agreement 433–434, 438–439
- Chinese
 - Direct Object Restriction 446–450
 - empty subjects 616–618, 621, 659–661
 - inverse theta role assignment 450–457, 474–491
 - resultative constructions 445–495
 - V-de* construction 445–450, 458–474
- Choctaw
 - weight-by-position 500
- Chugach
 - variable closed syllable weight 500, 505–509, 527–528
- Coeur d'Alene
 - voice unrestricted 268
- Cypriot Greek
 - see* Greek
- Dutch
 - and the feature [+IEPS] 67–83
 - auxiliary selection in 67–83
 - AVB/BV verbs 69
 - intransitives 72–75
 - mutativity 68
 - passives 71
 - scrambling 17, 27
 - transitives 69–72, 75–76
 - unaccusatives 69–75
 - voicing assimilation 268
- Dyirbal
 - markedness in optimality theory 674–675, 696, 699–708
- Eastern Ojibwa
 - variable closed syllable weight 505, 511–514
- English
 - empty subjects 628, 661, 665–666
 - personal pronouns 164–165
 - resultative constructions, compared to Chinese 445–450, 453, 462–474
 - temporal structure of discourse 123–158
 - thematic prominence and voice 687–689
 - variable closed syllable weight 500
 - voicing assimilation 268, 277, 288–282

- Finnish
 empty subjects 613–668
 vowel harmony 303–335
- Fox
 markedness 677, 686, 696–697
- French
 body-part NPs 220–263
 clitics 98, 100, 107–108
 denotation 713–779
 extractability 713–779
 Inalienable Possession Construction
 219–223, 249–263
 personal pronouns 161–169
- Galician
wh-islands 441
- Georgian
 voice unrestricted 268
- German
 A-/A'-properties of scrambling 2–3, 7–11
 argument linking 831–832
 empty subjects 616–617, 628, 661–662, 665–668
 IPC 230
 laryngeal neutralization 267–268, 273–276
 parasitic gaps 17–19
 scrambling 37–38
 weak crossover effects 14–17
 voicing assimilation 292–293
- Germanic languages
 movement 417
- Gooniyandi
 variable closed syllable weight 529
- Goróa
 variable closed syllable weight 505, 510–511
- Greek
 clitics 85–119
 double object clitics 99–105, 111–115
 functional heads as clitic hosts 92–99
 nominal denotation hypothesis 764–769
- Hebrew
 empty subjects 613–668
 resumptive pronouns in relative clauses
 587–611
- Hindi
 scrambling 2
- Huasteco
 weight-by-position 500
- Hungarian
wh-movement 435–439
- Italian
 clitics 86–88, 92, 96
 dative psych verbs 74–75
 empty subjects 616–618, 621–622, 626, 628, 659–668
 personal pronouns 165, 167
 unaccusativity 81
- Japanese
 A-/A'-properties of scrambling 2–3, 7–11
 barriers 424–425
 large-scale pied-piping 374–382, 390–392, 398–400
 layered specifiers 20–24
 long-distance scrambling 382–389
 negative polarity 392–396
 scrambling 29–36
 weak crossover effects 14–17
wh-islands 373–401
wh-scrambling 43–61
- Kannada
 voice unrestricted 268
- Kashmiri
 contextually light syllable weight 515–517, 525–526
- Kazakh
 vowel harmony 330
- Klamath
 weight-by-position 517–518, 526
- Latin
 weight-by-position 500, 524, 526
- Lummi (Coast Salish)
 markedness in optimality theory 676–677, 691–693, 696
- Lushootseed (Coast Salish)
 markedness 677, 690–691
- Macedonian
 enlarged stress domain 556–562

- interrogative clitic 541–582
- non-clitic auxiliaries 570–577
- prosodic/clitic systems 551–555
- Malagasy
 - DP structure 183–204
 - personal pronouns 161–216
 - pronoun deficiency 204–214
- Malayalam
 - weight-by-position 529
- Maori
 - no voicing in obstruents 268, 277
- Maung
 - no voicing in obstruents 277–278
- Middle English
 - dative psych verbs 75
- Mongolian
 - weight-by-position 500, 505, 513–514, 532
- Nahuatl
 - nominalization 783–834
- Ngarluma
 - markedness 704
- Nocte
 - markedness 677, 686, 696–697, 705–707
- Palestinian
 - see* Arabic
- Polish
 - voicing assimilation 268, 282, 290–292, 294, 298
- Portuguese
 - empty subjects 620
- Rembarnga
 - ergative case marking 704
- Romance languages
 - clitics 86–89, 105–106
 - movement 417
- Romanian
 - variable closed syllable weight 505
 - voicing assimilation 269
- Russian
 - empty subjects 620, 661, 664–668
- Salish
 - markedness 704
 - see also* Lummi, Lushootseed
- Sanskrit
 - voicing assimilation 268
- Serbo-Croatian
 - voicing assimilation 269, 294
- Spanish
 - clitics 86–89, 92, 105–106
 - empty subjects 616–618, 621–622, 626, 628, 659–668
 - wh*-islands 410, 440–441
- Squamish
 - markedness 677–678, 693–694
- Swedish
 - empty subjects 620–621, 661–662, 666–668
 - voicing assimilation 285–287
- Tamil
 - empty subjects 657–661, 667–668
- Tulu
 - voice unrestricted 268
- Tzotzil
 - markedness 677
- Uma Juman (Bornean)
 - weight-by-position 532
- Yalarnga
 - ergative case marking 704
- Yiddish
 - voicing assimilation 269, 279–281, 283–284, 294–297
- Yupik
 - see* Chugach variable

INDEX OF SUBJECTS

- A'-constructions
 - trace/pronoun alternation 587-591
- accentual units
 - see* enlarged stress domain
- Accessibility Condition 718, 721-735
- active zone 237-255
- adjunction 1-4, 30-31, 549-550
 - clitic 87, 116-118
 - see also* clitics, scrambling, Specifier Condition
- adverbs, temporal 125-126
- affectedness phenomena
 - see* telicity
- alignment constraints
 - and vowel harmony 316-325
 - see also* harmonic alignment
- alternative questions
 - syntactic representation of 367-368
- anaphors
 - and binding 235-263
- Argument Selection Principle 683-684
- argument
 - coherence constraint 791
 - linking 786-809
 - projection constraint 791
 - prominence hierarchy 793-798
 - saturation in nominals 815-818
 - symmetry of internal arguments 818-819
- aspect 741-746
- asymmetries
 - extractability 715-718
- autosegmental phonology 267-268
- auxiliary
 - non-clitic 570-577
 - selection 67-83
- Bare Phrase Structure theory 20
- barriers 412-415
- bimoraic vowels
 - prohibition against 501
- binding
 - body-part NPs and 219-263
 - theory and scrambling 12-15
- causativity
 - see* resultative constructions
- Checking Theory
 - and null subjects 625-627
- clause, infinitival 156-157
- clitics
 - double object 99-108, 111-115
 - functional heads as hosts 92-99
 - interrogative 541-582
 - postverbal 86-91
 - verbal, inversion of 566-569
 - see also* adjunction, prosodic/clitic systems
- clusters
 - complex 290-297
- coda
 - see* complex clusters
- coda weight 527-536
- collocational stress
 - see* enlarged stress domain
- complex codas
 - see* complex clusters
- complex onsets
 - see* complex clusters
- consonant extrametricality
 - as variable weight 518-526
- Constraint on Derived Tense Structure 140-147
- constraint
 - conjunction 697-699
 - reranking 703-705
 - interaction and stress 501-500
- coordination
 - symmetry condition 339

- syntax of 339–368
- correspondence constraints
 - applied to weight 501–504
 - edgemoat 505–511
 - nonfinal 505, 512–515
 - footbinarity 505, 512–515
 - weight-to-stress principle 505, 515–518
 - Wt-identity 501
- deficiency
 - morphological 204–214
 - phonological 210–214
 - pronoun 182–216
 - syntactic 189–191, 204–214
 - tests 174–183
- denotation
 - individual-denoting phrases 717–718, 737–779
 - nominal denotation hypothesis 717–718, 736–779
 - property-denoting phrases 717–718, 737–779
- determiner 184–186
- Direct Object Restriction 446–450
- discourse
 - temporal structure 123
 - coherence 688
- disharmony
 - root 303–304, 306–311, 315–323
 - see also* loanwords, vowel harmony
- disjunction 339–368
 - and movement theory 341–351
 - and reduction theory 351–365
 - missing subject 365–367
 - see also* left bracket thesis, gapping
- economy
 - condition 387–389
 - of projection 620–622
- empty subjects 613–668
 - and agreement features 622–625
 - embedded third person null subjects 647–652
 - identification 616–618
 - licensing 616–618
 - mixed null subject pattern 622–629
 - thematic subject omission 629–646
- enlarged stress domain 556–562
- entailments
 - thematic role 237–246
